1. Introduction

Welcome to RALS™ version 8.4.1 build 23.43.0342. This document details the fix found in this product version. For information regarding the installation, features, functionality, and use of this product, please refer to the Resources section.

2. System Requirements

- For existing customers remaining on an ARDx Informatics Provided Image (R70 platform) the following minimal requirements should be available to upgrade to this version of RALS:
  - C Drive must have at least 10 Gb of free space.
  - D Drive must have three times the size of the backup file.
- For customers implementing in a Customer Provided Environment the following minimal requirement should be available:
  - See Specifications for Customer Provided Environments

3. Supported Environments

- Supported Browsers:
  - Microsoft Edge
  - Google Chrome
  - Mozilla Firefox

4. Required Third Party Components

- No additional third-party components required. All components are installed on the RALS server as part of the product installation.

5. Bug Fixes

- The Abbott i-STAT® result values of ACT WBT received from the device are converted to ACT-C and ACT-K as appropriate based on the result test type for transfer to LIS/EMR system.
